

NOTICE TO RESIDENT

ALTA VISTA HOSPITAL LINK PROJECT

WORK IN CLOSE PROXIMITY TO VIA RAIL CORRIDOR

PROJECT UPDATE AND POSSIBLE NIGHT WORK OPERATIONS

April 2016

Dear Resident,

Please be advised that the City of Ottawa Alta Vista Hospital Link Project is well underway. Significant construction operations are recommencing within the VIA railway corridor. The City has worked with VIA Rail and the City contractor to minimize night operations. Work is underway now during daytime hours to complete work that would otherwise have to be completed at night. The day work is much less disruptive overall.

Due to rail safety requirements, a portion of the work may need to be conducted at night when trains are not travelling on this section of rail. Please see below a list of upcoming construction activities that will be undertaken along the rail line that may cause additional disturbance for nearby residents:

Railway Shoring	daytime operations	(April to mid-May 2016)
Railway detour track construction	daytime operations	(mid-April to mid-May 2016)
Railway cut-overs to detour	NIGHT OPERATIONS	(tentative May 20 to May 26, 2016)
Excavation for VIA bridge footings	daytime operations	(late May to early June 2016)
VIA Railway bridge construction	daytime operations	(mid-June 2016 to summer 2017)

A majority of this work is planned to occur during daytime hours. Isolated periods of night work could be required based on rail safety requirements.

The night work tentatively scheduled for mid-May 2016 will be further confirmed when the schedule is fully confirmed and at least a week prior to commencing the night work.

Other construction operations may require short duration night work and these activities will be conducted in accordance with the City noise by-law requirements.

We thank you for your continued patience during construction. For further information or to provide comments, please contact the City's Project Manager.
